This month will be an abridged version of the magazine in anticipation of our Bumper edition next month.

Congratulations to all who took part in the SA National Field Archery Championships.

The 60th South African National Archery Championships, African Continental Championships and the Continental Qualifying Tournament for the Youth Olympic Games are just around the corner so may we take this opportunity to wish you all the best of luck in your preparations for this important event.

Good luck also to all of you who are also attempting to qualify for the Commonwealth Games, the Youth Olympic Games and the World Field Archery Championships, we wish you all good shooting. May there be many personal bests and hopefully many new South African and World records.

If you have any important or interesting information regarding activities at your clubs or in your provinces we would love to know about it so that this can be published.

Please could you submit articles and especially photos (this makes the magazine much more interesting). With your efforts, the magazine will continue to grow from strength to strength.

Please note that the cutoff date for submissions to the SA Archer is the 20th of the month for publication in that month's edition. Any articles received after this date will be

published in the following month or subsequent editions of the SA Archer. Please could all submissions be sent to the Editor using the Raavi 14 Point Font size for articles and scores using the Raavi 12 Point Font size.

Cover pictures taken at the 8th FAA Outdoor Target Archery Championships held in Ain Sokhna, Egypt taken by Selwyn Moscovitz.

Articles published in the S A Archer do not necessarily reflect the view points of Archery South Africa, SANAA, SANIFAA, the SASAPD, ABO, SABA and NASP.

THE NEW CARBON MATRIX

EXCLUSIVE TO MAGNUM ARCHERY AND SELECTED SOUTH AFRICAN DEALERS

The ground breaking Hoyt Carbon Matrix marks much more than an epic advancement in Hoyt engineering; it triggers a quantum leap for the entire archery industry. Our lightest high-end bow ever, Carbon Matrix boasts a radical, high-tech, hollow carbon tube riser (patent pending) featuring O-Tech™ Technology*. Strategically crafted to yield new standards of lightweight design, vibration reduction, shootability and precision, every innovative inch of this engineering marvel is amazingly strong and stable. At 35" axle-to-axle, it delivers all the stability of a longer axle-to-axle bow, but with the super light mass weight of a much shorter bow. Yet, with all of this innovation and ground-breaking performance, Carbon Matrix shares the same legendary durability standards as all Hoyt bows. The 1500 shot dry fire test is no match for this bow. Virtually indestructible, the Carbon Matrix solidifies Hoyt's place as the unparalleled leader in archery engineering and innovation. This bow is custom from cam to cam. Quantities are limited.
